

# Region 10 Technical High School

December 2, 2020

Dear Students, Staff, Parent/Guardians and Community Members,

Please accept my sincere thanks for your commitment to opening and maintaining the Region 10 programs through this pandemic. Your acceptance and adherence to wearing protective material and equipment, and the following of health protocols that we require have been noticed and graciously appreciated.

As we move through our traditional holiday season it will be important for all of us to use our common sense and cautious optimism in our preparation for and participation in gatherings and celebrations. The decisions of each of us individually may have a profound effect on our schools, neighborhoods and communities.

While currently in a hybrid plan at Region 10 our goal is to return to a full operational status when the time presents itself. With that in mind we have begun conversations with the staff and the Cooperative Board about what that might look like if the health protocols in place remain. I will continue to update you on this issue throughout the school year.

It is my hope that we all stay well, safe and committed to the technical education that our students, communities, state and nation so desperately need.

Sincerely,

Paul K. Perzanoski  
Superintendent/Director
