

# Region 10 Technical High School

January 6, 2022

Dear Region 10 Students and Parents/Guardians,

We are finishing the punch list for the long anticipated opening of our portable classroom unit on January 18, 2022. During the next couple of weeks, we will also be moving furniture and supplies into the building.

Classroom space that will be located in the new building include the two portions of Foundations of Technology as well as English 11/12 and Pre-Apprenticeship. The shop instruction for Foundations will remain in its current location.

Our nurse, Mrs. Field, will have an office in the portables, as well as a contact area in the main building. Please check in the main office for her availability.

Early Childhood Education will conduct classroom instruction in the portable unit on Tuesdays and Thursdays. The Community Preschool program will remain in its current location.

Students that arrive to school late and have class in the portables, must still report to the main office to be checked into school. Once that is complete, they may venture over to the portable unit and ring the doorbell for entry.

It is our hope that the extra classroom space will give us opportunities for expansion in the future, and space to stretch and distance in the present.

Sincerely,

Paul K. Perzanoski  
Superintendent/Director
